

NB SLIDE BUSH

Doublelip-seal Z Option

Reducing Grease Leakage! Good for Ecology by Grease Saving

Structure

Part Number Structure

SM 16 G ZZ

ZZ: doublelip-seals on both sides

Applicable Part Number

- SM(S)6~30
- TRF6~30
- * ZZ option is available for standard type, long type, double-wide type, flange type, etc.
Please refer to NB general catalog for details.

Advantages

A doublelip-seal is a combination of outside lip-seal and inside lip-seal. Outside lip-seal prevents foreign particles from entering the bush. Inside lip-seal prevents grease from leaking out of the bush.

By the doublelip-seal, the seal resistance shall be increased by some margin.

NIPPON BEARING CO., LTD.

Grease-leak Comparison Test

Reference Data

test conditions: horizontal axis, applied load (no load),
maximum speed (60m/min), stroke (300mm)
